3 April 2007

MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Command Policy Memorandum - U.S. Army Materiel Command (AMC) Managed Communications Infrastructure Upgrade Approval Policy

1. Reference: Headquarters, U.S. Army Materiel Command (HQ AMC) AMCIO-B Memorandum, Subject: FY05 Army Knowledge Management (AKM) Goal 1 Resource Execution Guidance, 23 April 2005, (<https://www.us.army.mil/suite/doc/7227092>).
2. Effective immediately, upgrades or other enhancements to AMC managed communications infrastructures, whether wired or wireless, which exceed \$25,000 over the fiscal year must be reviewed and approved by the AMC CIO/G-6 prior to implementation. This policy applies to all initiatives, including Automatic Identification Technology, whether initiated by AMC or external organizations with the exception of those in support of the AMC G-2 Joint Worldwide Intelligence Communications System (JWICS) Program. Requests for review and approval will be forwarded through the respective Major Subordinate Command CIO to HQ AMC CIO (ATTN: AMCIO-B).
3. Requests will be submitted using the AKM Goal 1 Waiver Request process and documentation. This documentation is located at: <https://akodisc4ko1.us.army.mil/INTRANET/workflow/home.jhtml>. Technical review and approval is required regardless of the source of funding or funding entity. Documentation must contain a complete description of the project to include the architectural standard to which it complies, the business impact (mission) it supports and the associated cost.
4. A viable AMC IT infrastructure architecture is critical to the success of Army and AMC initiatives in support of the warfighter. This process will enable us to appropriately apply our limited resources to fulfill priority requirements while judiciously managing costs in achievement of AMC strategic goals.
